EXPERTS IN MANUFACTURING CLEANING EQUIPMENT

Since 1922

MADE IN
GREAT BRITAIN

WHO WE ARE

Since 1922 Hillbrush has been at the forefront of innovation in the production of high quality cleaning tools. Family led and family orientated, Hillbrush is proud of its rich history as part of the local community as well as being a world leader in its field. Now entering a new generation with a new facility and leadership Hillbrush continues its commitment not only to its team but also to its global customer base.

+44 (0)17 4786 0494

Our friendly and dedicated Customer Services Team are on hand to help you with your enquiry. Call us now and speak to one of our specialists, or organise a site visit from one of our Sales Representatives.

info@hillbrush.com

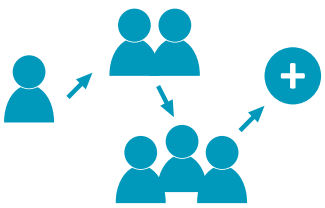
Email us any time with your enquiry and we will aim to respond to you within one working day. If you can't wait, don't forget to check our website first to see if you can find what you need.

Visit Us

If you would like to visit us we can arrange a site visit and tour of our facility in Mere, Wiltshire, UK. Phone or email us and speak to one of our advisors. If you would like one of our representatives to come to your facility please contact us.

ORDER ONLINE 24/7

It doesn't matter where you are in the world, our entire product catalogue is available on our website, with our products ready to order. Access support and information about Hillbrush any time, any day. If you do not already have an account with us, the set up process is quick and easy. See page 83 for more information.



SOCIAL MEDIA

Find Hillbrush on Twitter, LinkedIn and YouTube. Keep up to date with our products, news and announcements. Don't forget to connect with us!

CARRIAGE

hillbrush® BESPOKE

Hillbrush Bespoke offers a number of special services, ranging from product branding and special brush manufacture, to trade moulding, shadow boards and product design.

PRODUCT BRANDING

We have the in-house printing facilities and expertise to apply your logo to many of our products. We are able to hot brand wooden products and pad print both wooden and plastic hygiene products. Bespoke setup charges and minimum order quantities apply. Lead times may vary.

Contact info@hillbrush.com to order your bespoke branding. For more information see hillbrush.com/bespoke.

SPECIAL PRODUCTS

We are able to offer bespoke or custom brushware products designed for your unique application. These can be adaptions of existing brushes or the design and manufacture of new products. Bespoke set up charges and minimum order quantities will apply, and lead times will vary.

Contact info@hillbrush.com to speak to one of our team and find out more about our specials capabilities, or go to our website to fill out our special product enquiry form: hillbrush.com/bespoke.

FITTED BROOMS

We offer a variety of clamps, sockets and stays to strengthen and stabilise handles on most of our wooden brushes. They come in a range of sizes so that you can find the perfect accessory for your brooms. These can be bought separately or can be assembled for you by our in-house team. Please note that bespoke combinations are made to order and can occasionally incur longer lead times. Speak to one of our Customer Services team to find out about your options for fitted products.

Ordering information and existing fitted brooms can be found on pages 74-75.

TRADE MOULDING

Hillbrush Mouldings is a dedicated division within our new facility, equipped with state-of-the-art injection moulding machinery. We control all aspects of the moulding process, from sourcing FDA and EU Food Contact Approved plastics if required, to ensuring the best mix of plastics is used in composite products.

Find out more about Trade Moulding on page 93.

We are here to assist you with a wide range of key support services, ranging from marketing and exhibition support to product training and product literature. This is to ensure that you maximise your product knowledge and promotional opportunities. Read on for our key areas of support.

MARKETING SUPPORT

Our dedicated Design and Marketing Department is on hand to support your marketing needs. We have a comprehensive library of product information available to help you select the optimal product for any given cleaning application. From technical booklets and literature to informational videos, our team is here to help you better understand and promote our products. Ask us about personalised leaflets, newsletters, social media and website support as well as co-branded marketing materials. Call us or email studio@hillbrush.com to speak to one of our team. Don't forget that if you have registered on our website you will have access to our marketing resources and literature 24/7. See page 83 for more information.

PRODUCT TRAINING

Correct product selection and application can be critical in today's business environment. Our expert team is on standby to provide product training and best cleaning practice support to suit your business needs. This can be done onsite, at our new state-of-the-art premises, or at a location of your preference. We can also cater for one-to-one sessions or larger groups, either face to face or via digital conferencing. Call or email info@hillbrush.com to enquire. You can also access training material any time at hillbrush.com/media.

EXHIBITION SUPPORT

Our Sales and Marketing teams can support you with your attendance at trade shows, exhibitions and conferences. We offer advice on product selection and displays, as well as stand planning and layout, and the printed material you will find useful to give to potential customers. This allows you to maximise your presence and increase brand awareness. We can also assist you with social media marketing for Hillbrush products.

Find out more about how we can help you on pages 86-87.

HILLBRUSH.COM

Our ecommerce website hillbrush.com not only provides a quick way to research, view and order our products 24/7, but also provides you with detailed reports, extensive product and sales analysis, marketing support and convenient account management. See page 83 for full details and the key benefits to using our website to order products and find out information.

hillbrush HYGIENE

FDA Approved Materials

Campden BRI food and drink innovation

12 COLOURS

100% POLYESTER PBT

Hillbrush Hygiene is an internationally recognised brand of cleaning equipment in the food manufacturing industry. Using state-of-the-art machinery and pioneering technologies, we manufacture a world class range of high performance brushes, squeegees and other cleaning equipment, including Resin-Set DRS® Brushware, Total MDX Hygienic Tools® and Anti-Microbial Hygienic Tools™. We offer up to 12 colours to support colour coding in the workplace and establish HACCP and 5S standards. Our brushware contains stainless steel staples and does not use flagged fibres, and all plastics in our ranges have successfully undergone migration tests.

RESIN-SET DRS® BRUSHWARE

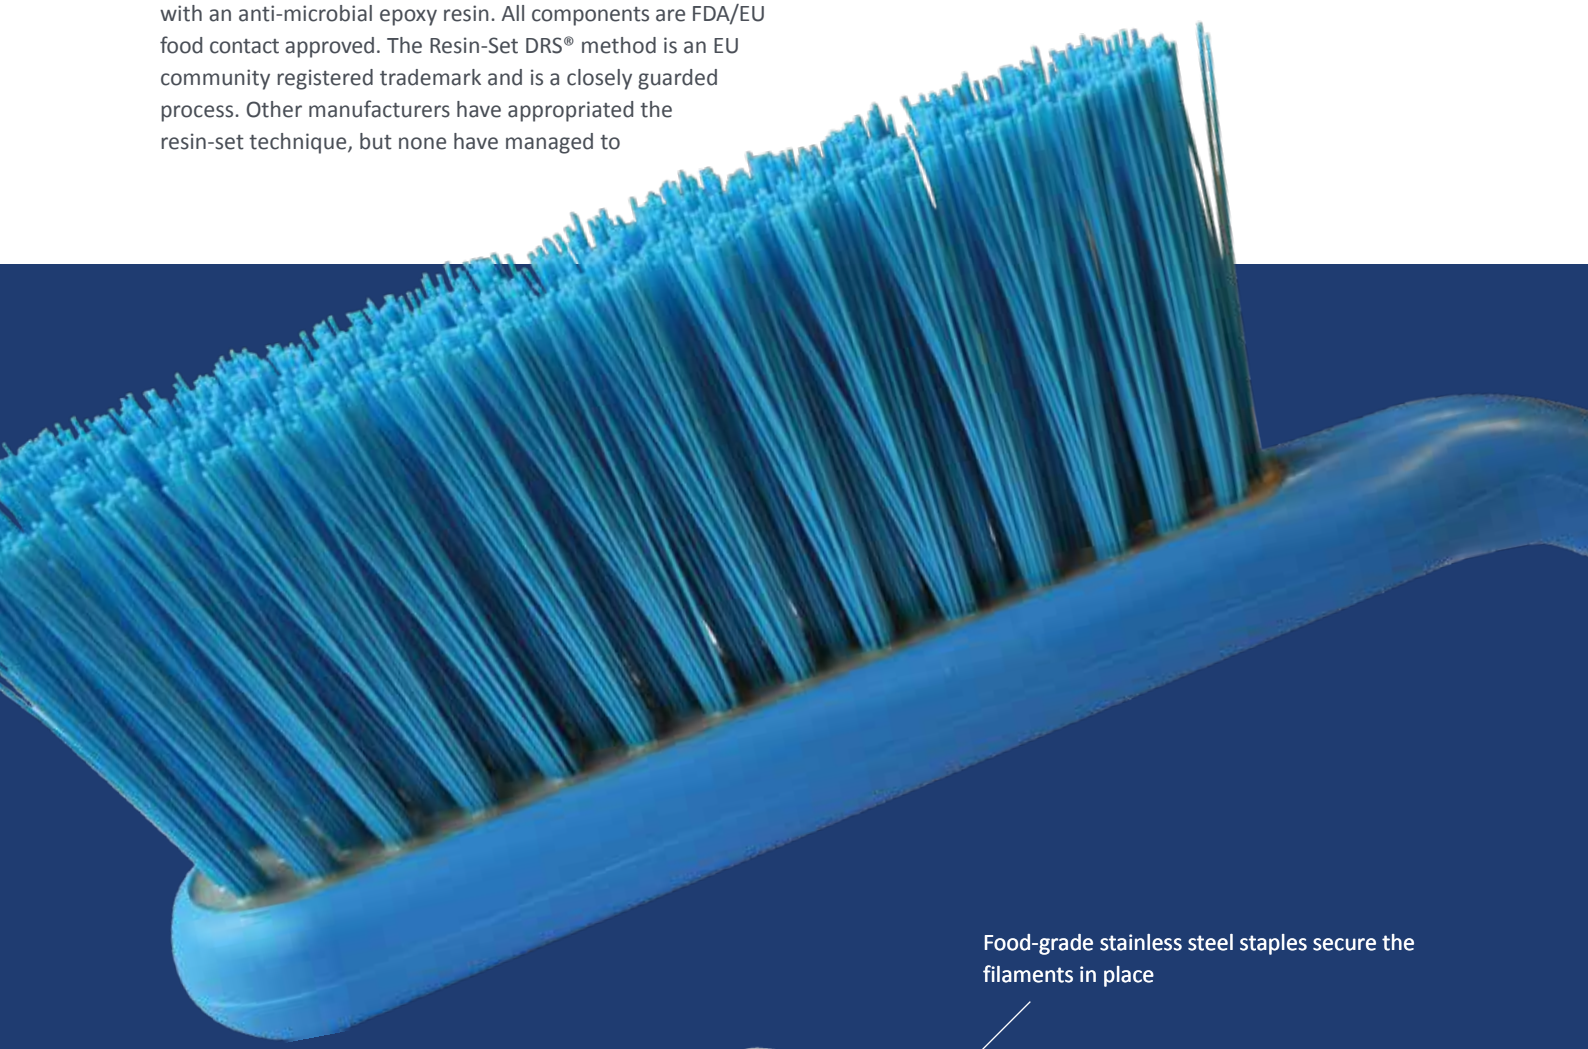
WORLD RENOWNED QUALITY | WORLD CLASS SAFETY

- ✓ Twice as strong as fused or moulded filaments
- ✓ The most comprehensive range of its kind
- ✓ Has a proven track record over a 30+ year history
- ✓ Recommended by industry professionals
- ✓ Excellent and reliable cleaning performance
- ✓ Up to 12 colours to support HACCP and 5S protocols
- ✓ Food contact approved by FDA and EU bodies
- ✓ Constructed from robust virgin materials
- ✓ Moulded and assembled by our expert team
- ✓ Autoclavable up to 134°C (275°F)

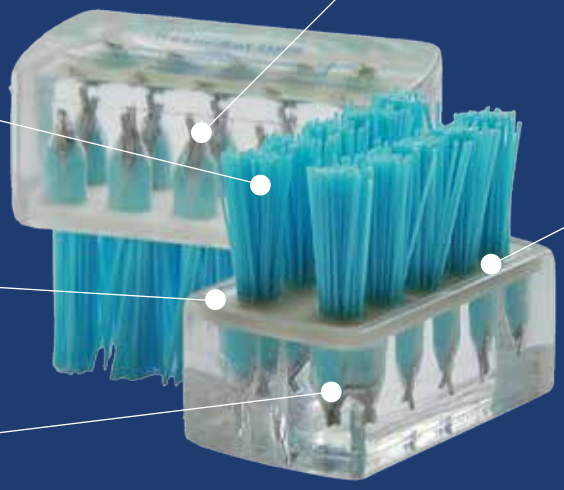
Our Resin-Set DRS® products undergo an extensive process at our factory in Wiltshire to ensure that the resin fills every void, eliminating areas where dirt and mould can accumulate and bacteria can spread.

Find out more: hillbrush.com/resin-set

First developed in 1986, Resin-Set DRS® is the world's most effective, versatile and reliable method of filament retention. The dual retention system (DRS®) minimises the risk of filament loss, which can have severe consequences in the food manufacturing industry. Food-grade stainless steel staples secure the filaments into a recessed brush back, which is then flooded with an anti-microbial epoxy resin. All components are FDA/EU food contact approved. The Resin-Set DRS® method is an EU community registered trademark and is a closely guarded process. Other manufacturers have appropriated the resin-set technique, but none have managed to achieve the same results as Hillbrush. Additives can also be added to the epoxy resin, like anti-microbial technology, which contains silver-ions to inhibit the growth of mould, mildew and bacteria, for unparalleled protection.



HOW IT WORKS



Food-grade stainless steel staples secure the filaments in place

Recessed area in brush back

Anti-microbial epoxy resin completely fills the recess, completing the DRS process

Filaments are folded and stapled to minimise filament loss

ANTI-MICROBIAL PRODUCT PROTECTION FROM THE **DANGERS** YOU CAN'T SEE

Hillbrush Anti-Microbial cleaning tools available in six colours

- Effective against up to 99.99% of bacteria, including Listeria
- Biomaster is tested to ISO:22196/2011
- Minimise microbial cross-contamination risks
- Maximise colour coded workplace segregation
- Infused with Biomaster Antimicrobial Technology
- Features Resin-Set DRS® dual filament retention system

Biomaster PROTECTED

DURABLE
HYGIENIC
EFFECTIVE

ANTI-MICROBIAL HYGIENIC TOOLS™

Our Anti-Microbial tools are designed for areas that require exceptionally high standards of cleanliness and due diligence in controlling bacterial contamination. Each component contains Biomaster Antimicrobial Technology, which uses a silver-ion base to inhibit the growth of a wide range of microbes such as MRSA, E. coli, Listeria spp and Campylobacter. All components are FDA/EU food contact approved. Save time, order online: hillbrush.com.

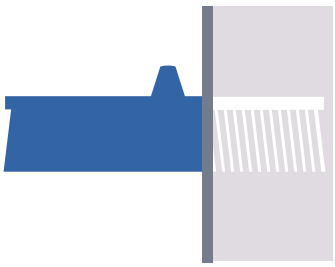
* We recommend conducting a resistance test before using this product on oily or acidic substances/surfaces, as some may cause an adverse reaction.

TOTAL MDX HYGIENIC TOOLS®



Our metal and X-ray detectable tools are specifically developed to minimise the risk of foreign object contamination within the food manufacturing industry. Each component is both metal and X-ray detectable, including the backs, filaments and resin used in the brushware. The detectability of these products has been independently tested using calibrated machinery and is not affected by time, moisture, cleaning or abrasion.

FDA Approved Materials

All components are FDA/EU food contact approved.

Polypropylene is light, durable and economic. It is a stiff material and has good impact resistance. The polypropylene is metal and X-ray detectable so if any chips do occur, it can be detected to avoid any excessive or unnecessary product wastage.

Find out more: hillbrush.com/mdx

Disclaimer: Hillbrush recommends that all products are tested in your environment to ascertain suitability and detection levels, as this will vary in different environments. There is no 100% guarantee of zero risk with any detectable products as outside factors can affect results. Use the QR code to read an article on metal detectability.

COLOUR CODED MDX BRUSHWARE

Our economical alternative to Total MDX still ensures high risk components are traceable within the production process. Only the filaments are metal detectable and X-ray visible. Available in up to four colours to support HACCP and 5S compliance, these brushes feature polyester filaments which are robust and can withstand temperatures up to 134˚C. They are suitable for use in industrial dishwashers or sanitisers. All components are FDA/EU food contact approved.

FOODSERVICE

Colour coded economical brushware with stainless steel staples. Available in up to 5 colours. Perfect for use in the food service and HORECA (Hotel, Restaurant and Catering) industries. All components are FDA/EU food contact approved.

- ✓ 100% food contact compliant
- ✓ Colour coded filament and brush back to fully comply with HACCP and 5S
- ✓ Bespoke branding available*
- ✓ Ultra competitive prices
- ✓ UK manufactured with low set-up fees and minimum order quantities
- ✓ Lightweight and durable, with excellent cleaning performance
- ✓ Designed specifically for the food service environment, including hotels, restaurants and catering industries (HORECA)
- ✓ Available in five colours for workplace segregation

- ✓ Fast turnaround and delivery times compared to offshore manufacturing
- ✓ Stainless steel staples are used to secure the filaments in place
- ✓ Available as a standard product range with the Hillbrush Hygiene brand

The Society of Food Hygiene and Technology · HACCP · FDA Approved Materials · HORECA · Members of Campden BRI · SQF Institute

DOUBLE BLADE SQUEEGEE

Our double blade squeegee features Dura-Flex™ natural mousse rubber with closed cell technology to prevent moisture penetration and promote longevity. Less pressure is required compared with single blade squeegees. All components are FDA/EU food contact approved.

Code Key: -RES = Resin-Set AM- = Anti-Microbial -MDX = Metal detectable and X-ray visible

* We advise you to carry out a resistance test before using this product on oily or acidic substances/surfaces as some may cause an adverse reaction.

CASSETTE SQUEEGEE

The high quality rubber and heavyweight plastic frame contributes to a longer product life, and the integrated cassette system allows the double blade cartridge to be replaced with ease, using a patented loading mechanism. When disassembled, each component can be cleaned thoroughly. All components are FDA/EU food contact approved.

COLOUR CODED HANGING SYSTEMS

These easy to use hanging systems are ideal for organising the workplace according to a colour coded system. Hanging cleaning tools up to air dry is much more hygienic than hand drying and provides visibility of any damaged or missing tools. Large and small hangers and hooks are available and can be used in any combination. The rails are easy to disassemble and clean. All components are FDA/EU food contact approved.

LITTERPICKERS

We offer a wide selection of well designed, durable litterpickers, including our own Hillbrush range. These are designed in the UK, for use in parks, schools, road cleaning, and other commercial applications. Try them with our handy HH1 bag hoop (see page opposite). Also useful around the home, particularly for users with limited movement.

hillbrush®
TRADITIONAL

Hillbrush Traditional has long supported the agriculture and construction sectors with exceptional tools. We combine sustainably sourced materials, including high grade timber and natural fibres, with a wealth of manufacturing experience. Many products from the Finest range have been used by the Royal Household and Hillbrush was granted a Royal Warrant in 1981. Many of our traditional products are manufactured at our Headquarters in the UK.

BY APPOINTMENT TO HM THE QUEEN
MANUFACTURERS OF BRUSHWARE
THE HILL BRUSH COMPANY LTD
MERE, WILTSHIRE

WHERE IN THE WORLD

We source fibres to use in our brush ranges from all over the world. Vegetable fibres used in our brushes are sourced from developing countries to support local communities, and the wood used in our brush backs is covered by an FSC® Chain of Custody certification (number TT-COC-001562).

1. Mexico
2. Ecuador
3. Brazil
4. Paraguay
5. UK / Spain
6. Germany
7. Italy
8. Czech Republic
9. Sierra Leone
10. Lesotho
11. Madagascar
12. India
13. Sri Lanka
14. China
15. Indonesia

To learn more about the fibres we use in our brushes, including their properties and suggested applications, visit our website www.hillbrush.com or use the following QR code:
You can also experience our interactive brush map display at our museum in Mere, Wiltshire.

OUR RANGES

Finest - We select only the best materials for use in our Finest range, ensuring unparalleled quality and craftmanship.

Industrial - High performance tools, designed to withstand rigorous use in factories, warehouses, yards and gardens.

Trade - Economical tools, recommended for every day use by builders' merchants and contract cleaners.

Essentials - All the tools to get you started. Designed to deliver great value alongside uncompromised performance.

FITTED PLATFORM BROOMS EXPLAINED

Platform Brooms often require bracing to ensure the handles don’t come loose when in use. (See pages 82-83 for platforms that are already fitted with a handle and stay.) Hillbrush supplies a variety of 28mm diameter handles and stays to fit all of our platform brooms. If you require a 1400mm handle and STYS2 stay (the most common combination) to be fitted to your platform brooms, please add the suffix FHS54 to the broom code. For full details of other combinations of handles and stays, see pages 82-83. Stays like the STYS2 work particularly well in open areas but can get in the way if you are trying to sweep in congested areas or under things like vehicles, racking or low cupboards. Hillbrush also offers metal and plastic flat top sockets to take 28mm wooden handles (A48/1, A54/2, A72/2) to avoid this problem. Contact us to learn more: info@hillbrush.com.

FITTED BROOMS

Many of our brushes in our Traditional range can be bought and delivered with fitted handles, and our platform brooms may be fitted with an additional stay or socket if required. The following section shows the most popular and common combinations, but other combinations are available on request. All wooden handles are sustainably sourced.

Our other wooden brooms can be made to order* with fitted handles at an extra charge per broom. Please add the following handle codes to the brush head code. For example: 14PFA48/1.

FA48/1	1200 x 23.5mm ø
FA48/2	1200 x 28mm ø
FA54/2	1400 x 28mm ø
FA60/2	1500 x 28mm ø
FTH48/1	1200 x 23.5mm ø (Threaded)
FTH54/2W	1400 x 28mm ø (Threaded)

Brooms can also be supplied fitted with stays (STYS2) and the following handles at an extra charge per broom. Add a handle code below to your broom head.

FHS48	1200 x 28mm ø
FHS54	1400 x 28mm ø
FHS	1500 x 28mm ø

All handles, stays and sockets may also be bought separately. See pages 84-85 for options.

BOXED TO GO

Barcoded and ready for display, the Boxed to Go range is perfect for volume distribution. Conveniently packed with the most popular combinations in up to 24 brushes and threaded handles per box. There is a wide range of filling materials to choose from, including natural fibres and plastic filaments. The products in this range use less packaging than custom assemblies so are more environmentally friendly.

9” Stiff Deck Scrubs with Handles

SAVE TIME, ORDER ONLINE

Our ecommerce website hillbrush.com provides you with a quick and straightforward way to search, view and order our products. If you need help finding information or setting up an account, call us on +44 (0)17 4786 0494 or email info@hillbrush.com.

THE BENEFITS OF ORDERING ONLINE

HILLBRUSH.COM

- Easily find products and a simple ordering process.
- Place orders when convenient for you, 24/7.
- Use our Quick Order Form for ease and efficiency.
- Instant order confirmations.
- Quickly assess stock availability.
- View a snapshot of your key metrics, including spend levels, product category split and most ordered products.
- View your historical orders, previous invoices and outstanding payments.
- Full access to Marketing Support material, including technical documents, product images and exhibition support material.
- Retrieve and view quotes.
- Easily manage and update your delivery details and communication preferences.

2019 PRICE LIST

View and download the 2019 product pricelist at our website: hillbrush.com/pricelist.

MARKETING SUPPORT

Visit hillbrush.com/media to download all of our product photos from our different ranges for use in your own marketing. You can also access our logo library, flyers, product literature and shadows. Speak to us to request your branded and co-branded marketing material.

We also have a brand guidelines page which you should read carefully before applying our branding to your literature, website or exhibition stand. You can read the guidelines at brand.hillbrush.com. Contact studio@hillbrush.com if you have further questions about the use of our brand material, or if you need any other marketing support.

DOCUMENTATION

All of our products are fit for purpose and comply with the most stringent industry regulations. You can download copies of our compliance certificates on our website: hillbrush.com/techinfo. Specification sheets and declarations of conformity for individual products are available on our website on every product page. Call our Customer Services team on +44 (0)17 4786 0494 or email for more information.

A shadow board is an organisational tool that enables you to segregate your workplace cleaning equipment. They can reduce the risk of cross-contamination and ensure that all of your cleaning tools are accounted for.

WHY USE SHADOW BOARDS?

- Equipment is stored efficiently and hygienically, making shadow boards an integral part of site improvement.
- Reduces replacement costs by ensuring equipment is always available and in good condition.
- Promotes employee accountability, high cleaning standards and workplace standardisation.
- Improves colour coded segregation, reduces the risk of cross-contamination, and reinforces colour coding policy on site.
- Shadow boards are fully bespoke to fit your needs and can include your company branding.

MATERIAL OPTIONS

Dibond

- A strong aluminium laminate with a solid polyethylene core, for high-traffic areas.
- A standard wall-mounted DiBond board is 3mm thick.
- These boards are compact, hygienic and portable options are available.
- Wipe-clean surface, which helps prevent dirt build-up and contamination.

Anti-Microbial Food Approved Plastic

- (See next page.)

SPECIFICATIONS

- Material thickness varies depending on the material type. Standard options are: Anti-Microbial, 3mm or 6mm, Dibond = 3mm, Foamex = 5mm.
- Standard shadow board sizes are available, but each board can be produced to your specific requirements.

SIZES

- 400mm x 600mm
- 600mm x 600mm
- 600mm x 1800 (Mobile unit also available)
- 1200mm x 1000mm
- 1200mm x 1800mm (Mobile unit also available)

Please enquire for any other sizes not on this list.

COLOURS

We offer shadow boards in 12 different colours. The boards can have a coloured background with white or black shadows, or a white background with coloured shadows. Please specify when you order your boards.

EASY 5 STEP ORDER PROCESS

- Enquire with our Customer Services Team
- Artwork will be created and sent to you for approval
- Payment terms are agreed upon artwork approval
- Shadow board designs are sent to the manufacturer
- Shadow boards are delivered to one UK address*

We also have an online shadow board order form which you can fill in on our website hillbrush.com/sb

* UK or International delivery available. Please note when ordering.

Anti-Microbial shadow boards are made from food approved plastic that has been infused with Biomaster Antimicrobial Silver-Ion Technology. Chemical and water resistant, B1 fire proof, anti-static and extremely durable, our Anti-Microbial shadow boards provide the ultimate protection against contamination and the most advanced method of workplace organisation.

- BESPOKE
- ANTI-MICROBIAL[1]
- DURABLE
- WATERPROOF
- HEAT RESISTANT
- LIGHTWEIGHT
- FIRE RESISTANT[2]
- ANTI-STATIC
- RECYCLABLE
- FOOD SAFE INK
- ECO-FRIENDLY
- NON-TOXIC
- PORTABLE OPTIONS
- UV RESISTANT
- CHEMICAL RESISTANT[3]
- CO-EXTRUDED FOOD APPROVED PLASTIC

Biomaster Silver-Ion Antimicrobial Technology inhibits the growth and spread of bacteria. Biomaster is infused throughout the boards, providing permanent protection.

Anti-Microbial shadow boards are co-extruded (two or more materials are sealed together by heat) and can be recycled at the end of their lives at appropriate recycling facilities.

- Co-branded product promotional material
- Hillbrush catalogue (main and hygiene-specific available)
- Hillbrush Corporate Brochure
- Technical Hygiene Booklet
- Product information flyers
- Table top shadow board complete with smart hooks and products (on request)
- Total MDX demo brush

TECHNICAL SUPPORT

We will endeavour to join you during the exhibition to provide product training, attend customer meetings and offer product technical support. This is dependent on the location of the event and the availability of Hillbrush personnel.

ADVICE AND GUIDANCE

Our Marketing Department can assist you with how best to display Hillbrush products on your stand, which products are most suited to the target audience and also provide product and brand training, if required.

Contact Customer Services or email info@hillbrush.com to request exhibition support.

Hillbrush can provide a metal stand free of charge to display Hillbrush Hygiene products on hooks and hanging systems. There are three levels of product display available, dependant on the target market.

ULTRA HYGIENIC (TOP LEVEL)

Includes samples of the most technically advanced products available in the Hillbrush Hygiene range: Resin-Set DRS®, Anti-Microbial Hygienic Tools™ and Total MDX Hygienic Tools®.

PROFESSIONAL HYGIENE (MID LEVEL)

This selection of products feature high quality brushware and cleaning tools for all manner of applications.

FOODSERVICE (ENTRY LEVEL)

Featuring a selection of economical brushware and cleaning tools designed for use within the hospitality sector.

CHARTER FOR PROFESSIONAL HYGIENE BRUSHWARE

Hillbrush is registered to the FEIBP (European Brushware Federation) Charter for Professional Hygiene Brushware and ensures that products belonging to the Hillbrush Hygiene brand are compliant in every aspect.

The FEIBP responded to a market requirement by introducing a Charter for Professional Hygiene Brushware. The Charter has been established so as to enable the purchasers of this type of product to be confident that they will be supplied with high quality professional brushware which comply with all existing hygiene regulations. The customers still have the responsibility of organising their own hygiene systems, but will be assured that if they purchase professional hygiene brushware from an FEIBP registered manufacturer it will be fit for purpose. We herewith inform you that the renewed PHB logo is officially registered as EU collective trademark no. 010919132.

1. DEFINITION OF HYGIENE BRUSHWARE

These are products from the brushware sector which are intended for use in any food business (which includes preparation, processing, manufacturing, packing, storing, transportation, distribution, handling or offering for sale or supply, see COUNCIL DIRECTIVE 93/43 ECC 14 th June 1993) or other hygienically sensitive areas such as hospitals, etc. The products are characterised by the fact that they are constructed in such a way, and of such materials, that they will not in themselves absorb bacteria or contaminate any food stuffs or sensitive areas during their normal use. The materials should be corrosion proof and non-toxic, and the products should be able to withstand sterilisation or disinfection by other processes, including chemical treatment.

2. SPECIFICATIONS OF BRUSHES, HANDLES AND SQUEEGEES

2.1 BRUSH COMPONENTS

The brush components must be made of materials resistant to solvents, chemical cleaning agents and temperatures required for disinfection. The components must not contain Chlorine. Any additives/compounds or colourants must be food grade of a recognised standard, and must not contain lead, mercury or cadmium. No hollow or flagged fibres are to be allowed or used.

2.2 BRUSH FILLING MATERIAL FIXING

The brush filling material retention must be by means of either wire (which cannot be attacked or made brittle by oxidisation) and/or by means of epoxy resin, which is made up of food grade components of a recognised standard, or of fused construction.

2.3 HANDLES

Handles must be manufactured from food grade stainless steel or fibreglass with a topcoat, or aluminium which is either anodised or coated with approved materials, or plastic. All handle fittings (handgrips and threads) must be made from materials as those defined under “brush components”.

2.4 SQUEEGEES

Squeegees for hygiene areas which use solid rubber or foamed rubber with minimum 95% closed cells in a double up construction, must be designed in such a way, that they can be cleaned, disinfected and inspected.

2.5 RELATED CLEANING EQUIPMENT

Plastic hand scoops, hand scrapers, shovels, containers/bins, stainless steel hand scrapers and floor scrapers.

2.6 MARKING/IDENTIFICATION

All marking of the products must be carried out by the best technical and hygienic methods possible, prescribed or not.

EXCLUSIONS OF LIABILITY

Information contained in this or any other Hillbrush catalogue is provided in good faith to assist in the correct application of the products specified. The information provided is accurate to the best knowledge and belief of Hillbrush. The use and application of the information contained within the catalogue remains, at all times, the responsibility of the user who should ensure the suitability of the products for the intended application. Hillbrush accepts no liability whatsoever (except as otherwise provided by law) arising out of the misuse of the information provided. Specifications may be changed without notice.

COLOUR CODING AND HACCP EXPLAINED

The Hillbrush Hygiene range is a comprehensive collection of brushware and other hygienic cleaning equipment that ensures the highest standards of cleanliness and hygiene can be maintained.

COLOUR CODING

The use of colour coded cleaning tools within the food industry can greatly assist in reducing the risk of cross-contamination. A methodical, colour coded approach associates each product with a particular area, promoting inter-departmental and/or allergen segregation. Hillbrush Hygiene is colour coded with up to twelve vibrant, easily identifiable colours to choose from.

THE 5S SYSTEM

A simple process to create a safer, cleaner and well-organised workplace, through order and standardisation. These principles work alongside HACCP guidelines to improve efficiency and profitability.

1. Sort – establish which tools are needed in which area
2. Set in place – organise into designated colour-coded zones
3. Shine – carry out regular cleaning and maintenance
4. Standardise – set out cleaning and maintenance procedures
5. Sustain – ensure standards are followed

HACCP

Hazard Analysis and Critical Control Points, or HACCP as it is commonly known, is a preventative approach to food safety from biological, chemical, and physical hazards in food production. By identifying critical control points, the HACCP system can be used at every stage of the food chain from manufacturing through to distribution.

THE SEVEN KEY PRINCIPLES OF HACCP

1. Conduct an analysis of hazards
2. Determine the Critical Control Points
3. Establish critical limits
4. Set up a monitoring system
5. Establish a procedure for corrective action
6. Establish procedures by which to verify the effectiveness of the HACCP plan
7. Maintain thorough records

HOW HILLBRUSH HYGIENE CAN HELP

Hillbrush Hygiene is known worldwide for our selection of high quality cleaning tools. We have a substantial catalogue of cleaning products suitable for a wide range of applications, including ultra-sensitive food contact areas, hospitals, food manufacturing facilities, kitchens and other catering establishments, and personal use. Manufactured in the UK, Hillbrush Hygiene boasts unparalleled features and benefits. All products in the range are autoclavable up to 134˚C (275˚F), exceptionally durable in their construction, and most are manufactured from FDA and EU food contact approved materials. These features, along with our extensive range of standard and specialist products and organisational systems, keep Hillbrush Hygiene at the forefront of hygienic cleaning. We are committed to providing the best products and customer service to help you reach and maintain the highest cleaning standards possible.

PRODUCT CARE AND MAINTENANCE

CLEANING YOUR TOOLS

- Remove visible dirt and foreign objects with a stiff brush.
- Use a cleaning solution with a pH 5 or less.
- Rinse thoroughly with clean water.
- If lime residue has formed on a tool it can be removed by washing in a cleaning solution with a pH 5 or less.
- Clean after washing with an approved disinfectant.
- Remove disinfectant residue by rinsing with clean water or using an industrial dishwasher (82°C/175°F).
- Hillbrush Hygiene products can be sterilised by autoclaving at temperatures up to 134°C/275°F.
- Ensure tools have sufficiently cooled before using again.
- Use a wall hanging system to hygienically air-dry the tools.

STORING YOUR TOOLS

- Store cleaning equipment away from working surfaces.
- Install shadow boards in partitioned work areas.
- Use a colour-coded hanging system to organise tools and avoid cross-contamination.

REPLACE YOUR TOOLS WHEN:

- Filaments are entangled, creating bacterial growth hotspots.
- Filaments are worn excessively or discoloured.
- Plastic moulds are scratched badly or marked.
- The handle is broken or bent.

PROPERTIES OF MONOFILAMENTS

PRODUCT COMPLIANCE INFORMATION

We hereby confirm that all products in our hygiene range comply with the legal regulations laid down in the European Plastic Regulation (EU) No 10/2011 as well as in Regulation (EC) No 1935/2004, both as amended. (More information is available on request.)

- Individual data sheets to satisfy your customers and their auditors are available on each product page on our website.
- Full product compliance documentation is also available covering all available Hillbrush Hygiene products, including migration test and detectability information. (Available from hillbrush.com/techinfo)

The table above and the table over the page act as a guide for using the listed chemicals as stated. Tests should always be carried out when using chemical combinations or substances not listed. We are unable to accept responsibility in respect of factors, which are outside our knowledge or control and affect the use of products. No warranty is given or is to be implied with respect to such information. Freedom under patents, copyrights and registered designs cannot be assumed. For additional information, please visit our website where you can download further Chemical Resistance Guides: hillbrush.com/uk/About/Technical-Information/material-properties/

Please contact us for information about Polyether Ether Ketone (PEEK)

CHEMICAL RESISTANCE GUIDE

Tolerance Ratings

Good | Fair | Poor | Do Not Use

The above information is given on the assumption that the temperature of the chemical does not exceed 20°C.

Please contact us for information about Polyether Ether Ketone (PEEK)

ENVIRONMENTAL POLICY

Hillbrush is committed to protecting and preserving the environment, in respect to the products we produce as well as their manufacture and packaging.

All the vegetable fibres used in our brushes are harvested from developing countries, and in many cases support local communities and help us further our commitment to corporate social responsibility.

Hillbrush has an FSC® (Forest Stewardship Council®) Chain of Custody certification (TT-COC-001562) for wooden brush backs and other wooden products. This means that the FSC® raw material used to produce these wooden parts can be traced back to an FSC® certified forest. The non-FSC® timber used by the company comes from managed forests or from suppliers with other sustainable timber schemes (such as the German PEFC™ scheme).

We encourage our customers where possible to change from buying brushes with fitted handles to threaded handles. Packaging is much smaller, reducing transport costs and carbon emissions.

Hillbrush strives to use a minimal amount of packaging materials and complies with all Environmental Protection Agency Waste Packaging Regulations (2007). The weight of packaging per product is available on request.

All plastic products manufactured by Hillbrush comply with Environmental Protection Agency recycling regulations.

Energy and water consumption are a prime concern and air from our main extraction system is recycled back into the production building to reduce the loss of heat. We have also installed automatic taps to further control our water consumption.

All waste packaging received is recycled.

The Company has recently updated its moulding machinery with energy efficient machines that use considerably less power.

In 2017, Hillbrush constructed a brand new manufacturing and office building. Efficient LED lighting has been installed across the site, operated via sensors and timers to reduce energy wastage. Wall and roof insulation is compliant with the latest energy efficiency standards. We have installed two electric car charging points for environmentally friendly vehicles.

We have installed a 250kw PV solar generating system at our new facility in Mere, Wiltshire.

TRADE MOULDING

The Hillbrush Trade Moulding Division produces moulded products from concept to production. We also welcome enquiries for bespoke moulded products.

We control all aspects of the moulding process, from sourcing FDA and EU food contact approved plastics if required, to ensuring the best mix of plastics and rubber is used in composite products.

A BRIEF HISTORY

Up until 2011, the Company had used four trade moulding companies to produce their plastic parts, but it was decided that more control was required over the moulding process and the materials being used for the hygienic range of products, and as a result the Company bought one of the trade moulding companies. All new state of the art moulding machines were purchased and the business was relocated to the old factory premises in Mere in 2014. The moulding department at the new premises has an automated material feed system, an integrated cooling system and an overhead crane for quick mould changing. The department has been designed with the capability of considerably increasing the number of moulding machines.

KEY SERVICES

- Assembly
- Insert moulding
- Low and high volume production
- Plastic overmoulding
- Pad printing
- Option to sub-contract moulds
- Project management for mould tool production
- Technical and specification advice

CAPABILITIES

Our modern Injection Moulding facility consists of some of the latest injection moulding machines ranging from 90 tons to 380 tons locking force. Each machine has an automatic material feed system which takes the polymer from an internal material silo. This is supported by two automatic dosing systems for colour and other additives such as anti-microbial and metal detectable. We have the capabilities to mould most thermal plastic materials, Polypropylene, Polyethylene, Polycarbonates, ABS, Nylon and Acetal, and also glass or mineral-filled polymers.

MATERIALS

Materials used include; POM, PA66, PP, ABS, Polycarbonate, GPPS, HIPS and HDPE. Speak to a member of our team to learn more about the materials we use.

THE ENVIRONMENT

We constantly work to reduce our carbon footprint, and with the predominant use of plastics within our moulding department we make sure to recycle where we can and help reduce waste to a minimum.

CONTACT US

If you have a specific trade moulding requirement and would like to send us an enquiry, email trademoulding@hillbrush.com and we will be happy to help.

ISO 9001 CERTIFICATION

Our ISO 9001 Certification means that we set out key quality management principles, emphasising the importance of strong customer focus, the motivation and implication of top management, the process approach and continual improvement. Hillbrush is passionate about providing the highest level of customer service and producing superior quality products. ISO 9001 compliments our company ethos and ensures our rigorous quality control processes are upheld.

- Products available in *up to* the stated amount of colours**

*According to FEIBP regulations

**Not all products per category are available in all colours noted on the colour wheel

When ordering our colour-coded products, please use the colour notations below (listed in brackets next to the relevant colour) to denote which colour you would like to purchase. On the majority of our Hygiene products, add the colour notation to the end of the product code. For example, if you wish to purchase a Yellow B861, simply add a Y to the end of the code as so: B861Y.

Please note: Our Resin-Set DRS® and Colour-Coded MDX products will need the colour notation before the RES or MDX notation. For example, B861YRES, or B861YMDX. Our Total MDX (dark blue) does not need a colour reference.

- Blue (B)
- Black (BLK)
- Brown (BRN)
- Green (G)
- Grey (GRY)
- Red (R)
- Tangerine (T)
- Violet (V)
- White (W)
- Yellow (Y)
- Anti-Microbial Purple (P)
- MDX Dark Blue †

† Colour notation already within product code

When ordering our products you will notice there are variations for certain products. These are explained using the following key:

AM: Anti-Microbial **MDX**: Metal detectable and X-ray visible **RES**: Resin-Set DRS® Brushware

HILLBRUSH TIMELINE

1922
Hillbrush founded by brothers Fred and Bill Coward

1920s

1926
The brush fibre department was started

1927
Move to Lordsmead Mill, Mere

1930s

1935
Move to Woodlands Road, Mere

1935
First semi-automatic brush making machine was purchased

1940s

1947
Hillbrush purchased its first fully automated brushmaking machine

1950s

1952
Hillbrush received a visit from HM the Queen

1950
Woodworking department opened

1960s

1967
Patent Products (Poole) Ltd purchased

1960s
The first hygiene brushes were made

1970s

1979
The first hygienic brushes were exported outside the U.K

1979
First electric-controlled machine introduced at Hillbrush

1980s

1981
Hillbrush was granted a Royal Warrant for services to the Royal Households

1986
Resin-Set DRS® was developed

1990s

1999
The first Hillbrush website launched

2000s

2001
Hillbrush purchased Champion Brush, which is now a part of Hillbrush Inc. based in Baltimore, USA.

2008
Hillbrush acquired J. H. Velthoven, a fibre dressing business from The Netherlands

2016
Move to Norwood Park, Mere

2017
Visit Hillbrush was launched, combining a restaurant, shop and museum. Find out more www.visit.hillbrush.com

@VisitHillbrush @visit_hillbrush
